CARULLA VICTOR

DevOps / Site Reliability Engineer

carulla.victor@gmail.com
linkedin.com/in/vcarulla/
vcarulla.com

Production systems · Kubernetes · CI/CD · Observability
DevOps / Site Reliability Engineer focused on improving system reliability, deployment workflows and operational visibility. Strong hands-on experience supporting production systems, CI/CD pipelines and containerized environments.
Background in software development *(backend and frontend)*, which provides a strong understanding of developer workflows and operational needs.

EXPERIENCE

BiBank, *DevOps Engineer | SRE*

MAR 2024 – PRESENT

- Designed and rolled out a hybrid on-prem/AWS container platform (Docker Swarm, Traefik, Harbor, Vault, Consul), driving the migration from a legacy Linux/Windows swarm.
- Standardized CI/CD with parameterized Jenkins and GitLab CI pipelines, enabling self-service deployments across teams.
- Led root-cause analysis of production incidents in a banking environment: JVM memory/GC, TLS/JVM compatibility, SQL Server failover, overlay MTU and third-party connectivity.
- Operated AKS production clusters: version upgrades, probe/resource tuning and load-balancer troubleshooting.
- Centralized secrets management with Vault and drove security hardening: certificate lifecycle and vulnerability patching campaigns.
- Rebuilt observability with Grafana/Loki, Prometheus, Zabbix and Kuma, including threshold-based alerting adopted across teams.

Azure · AWS · Kubernetes (AKS) · Helm · Docker Swarm · Traefik · Harbor · Jenkins · GitLab CI · Vault · Consul · Elastic Stack · Grafana/Loki · Prometheus · Zabbix · Kuma · Kafka

Fpay, *DevOps | SRE*

JAN 2021 – MAR 2024

- DevOps point of contact for multiple backend and frontend teams, supporting the full deployment and operational lifecycle of microservices in production cloud environments.
- Evolution of the Infrastructure-as-Code and automation platform, strengthening pipelines and supporting the transition from Jenkins to GitLab CI.
- Operation and maintenance of Docker Swarm-based infrastructure on Azure, ensuring platform stability in distributed environments.
- Incident management across critical platform components, including API gateway (KongHQ), messaging systems, and managed data services such as MongoDB Atlas and BigQuery.
- Improvement of observability and monitoring practices (ELK, Datadog) during high-demand operational periods.

SKILLS

Containers & Platforms
- *Docker, Kubernetes*

Containers & Orchestration
- Container runtimes (*Docker, Docker Swarm)*
- Orchestration *(Kubernetes - AKS)*
- Package management & registries *(Helm, Harbor)*

CI/CD & Automation
- Pipelines *(Jenkins, GitLab CI)*
- Scripting *(Bash)*
- Configuration management *(Chef)*
- Infrastructure as Code *(Terraform)*

Platforms & Systems
- *Azure, GCP, AWS, Cloudflare, Linux, Proxmox*

Observability & Monitoring
- Metrics and dashboards *(Zabbix, Kuma, Prometheus, Grafana/Loki)*
- Logging and APM *(Elastic Stack, Datadog, Instana)*

Azure · GCP · Docker Swarm · Kubernetes · Terraform · Jenkins · GitLab CI · Chef · KongHQ · ELK · Datadog · Vault · Cloudflare · MongoDB Atlas · BigQuery

Technisys, *Backend Developer at Fpay*

SEP 2019 – JAN 2021

- Backend development for a multi-country digital payment wallet, integrating financial services across regulated environments.
- Design and implementation of backend components for asynchronous payment transaction processing using messaging queues, handling persistence, transactional state management, and retry mechanisms.
- Implementation of integrations with external systems and collaboration on financial traceability and auditability.
- Collaboration with infrastructure teams on deployment, configuration, and service reliability.

Node.js · Express · RabbitMQ · MySQL · Redis · Docker · Jenkins · Kong · Instana · JWT · MongoDB

Technisys, *Frontend Developer at Banco Itaú*

JUL 2016 – AUG 2019

- Development and maintenance of the Banco Itaú mobile banking application.
- Development of Angular/Ionic components and services to support multi-step operational flows and client-side validations.
- Resolution of cross-platform styling and compatibility issues using SASS.
- Integration of banking APIs and analytics tools, including participation in mobile build and store release processes (Android/iOS).

Angular · Ionic · TypeScript · RxJS · SASS · Cordova · REST APIs

DoWhale, *Frontend Developer*

OCT 2014 – JUL 2016

- Development of responsive, public-facing web applications with focus on usability, cross-browser compatibility, and performance optimization.
- Integration with REST APIs and client-side interaction logic.

JavaScript · HTML5 · CSS3 · Responsive Design · REST API Integration · WordPress

Freelance, *System Consultant*

AUG 2007 – OCT 2014

- System administration and infrastructure consulting for small and medium-sized companies.
- Deployment and maintenance of Linux and Windows servers, networking equipment, virtualization platforms, and backup solutions.

Linux Servers · Windows Servers · Networking · Virtualization · Backup Solutions

Infrastructure & Security

- Secrets management *(Vault, Consul)*
- API Gateway *(KongHQ)*

Messaging & Data

- Message brokers (*RabbitMQ, Kafka)*
- Databases *(MongoDB, MySQL, Redis, BigQuery*)

Backend

- Runtime and frameworks *(Node.js, Express)*
- Authentication *(JWT)*

Frontend & Mobile

- Frameworks *(Angular, Ionic)*
- Languages and tools *(TypeScript, RxJS, SASS, Cordova)*
- API integration *(REST APIs)*

LANGUAGES

ENGLISH
Basic Professional Proficiency.

SPANISH
Native.

Sirius IT Solutions, *IT Store Owner*

JUL 2011 - OCT 2013

- Hardware sales and system configuration.
- Technical support, network setup and ongoing monitoring.

BullNet, *IT Employee*

FEB 2010 - SEP 2012

- Responsibilities included sales, customer support and systems configuration.

Cybercafé Maniac, *General Employee*

MAR 2004 - DEC 2005

- Responsibilities included Customer support and network maintenance.

EDUCATION

EDUCACION IT — *Information Security Career*

2013 - 2014

· Career in system security, vulnerability mitigation and infrastructure protection.

LICENSES & CERTIFICATIONS

UDEMY — *HELM - Package Manager for Kubernetes Complete Master Course*

AUG 2023

http://ude.my/UC-f0e620a4-386c-4590-ac97-363ffeb8aa45

UDEMY — *Pipelines, CI/CD and DevOps*

AUG 2022

http://ude.my/UC-6b450b02-cd62-4f99-be7a-a124ee3af4a8

UDEMY — *Kubernetes Certified Application Developer (CKAD)*

OCT 2020

http://ude.my/UC-539fdf14-c751-4282-9679-34f9e012f26e

IT COLLEGE — *AWS Discovery Day*

SEP 2020
